

## Pine Point is Growing!

In the last few years we've been able to report on significant growth at the School. That growth has come in the form of enrollment (currently 270 students), the addition of a wonderful new Library/Technology Center and substantial enhancements to the infrastructure, and the addition of over \$1.3 million in new gifts and pledges to the endowment. As well, Pine Point continues to initiate partnerships with organizations across the globe.

Now, through the generosity of Mr. and Mrs. Thomas Moore and friends of Pine Point, 42.2 acres of property immediately adjacent to the athletic fields has been deeded to the School. The property has conservation restrictions, meaning no buildings or permanent structures will ever be allowed. The educational and recreational opportunities for this new land are significant. To that end, a group will be formed to determine how to best use and maintain this outstanding, historically rich space.
